

Mackensie Jack

Software Engineer

SUMMARY

Creative, motivated software engineer with an interest in UX and design and a background in childcare, art, and technology. Have a library of full stack web apps as well as Agile team and freelancing experience looking to bring my skills to a company where I can contribute to a product used globally.

WORK EXPERIENCE

Software Engineer at 100Devs

December 2022 — Present

- Collaborated with several teams of developers to build responsive web applications
- Building semantically structured full-stack web applications
- Applying agile methodologies like SCRUM for project management

Recent Projects:

[The Hyrule Compendium Game Guide \(fullstack web app\)](#) - User enters a query to access the Hyrule Compendium API. Meant to be a quick-access game guide for Breath of the Wild.

[Secondhand \(fullstack web app\)](#) - A social site for sharing gently used goods for free under the Buy Nothing Project. Features accounts, messages, posts, feed, likes, comments.

[Awaken Hair](#) - A static site mock up for a client, using some material design principles, several component libraries, and used this to make a tutorial for my [blog](#) as well.

Blossom (fullstack web app) - A solo project based on my work as a nanny, this is a mobile app designed with two main interfaces (parent and caregiver). It is an app purposed to communicate schedules, share photos, and hold pertinent information regarding the child.

Geek Squad Consultation Agent at Best Buy

March 2022 – Present

- Provide positive, timely service to clients
- Understand technology issues, asking questions, listening, asking follow-up questions, taking detailed notes and providing accurate time estimates for next steps
- Help set up, troubleshoot, and repair devices (hardware and software related)
- Monitor service queues and provide status updates to clients
- Clearly communicate with team

Freelance Artist | Luna Moth Dolls | Albany, NY

June 2017 — March 2020

I worked as an independent artist, running a successful online business where I offered commissions for artist dolls. I learned fiber-crafting, sewing, painting, and sculpting to accommodate the needs of my clients, who I worked closely with to meet their vision. I also used SEO, social media, and positive experiences with clients to promote my business and

art online. I built my own website through the Shopify utility and implemented my own HTML/CSS design to further my brand.

Nanny | Albany, NY

April 2015 — March 2022

Provided full-time care for four different families over seven years. Managed routines, provided care, and made developmentally appropriate routines for children ages 0-12. Need to multitask, understand the social and emotional needs of others, be adaptable and quick on your feet, and have plenty of energy and endurance in this kind of work.
